

SPOTCHECK

Instant Playback Spot Monitor Recorder for CCTV Operators

Features and Benefits

- Instant reverse playback
- Mark events for instant playback
- Pause live video
- Very high quality real-time recordings
- Fast evidence production
- Simple 5 minute installation
- Records to Compact Flash (4 to 16GB)
- Hot-swap replacement of CF cards
- All solid-state - no hard disk, no fans
- Totally silent operation

SPOTCHECK is a superb tool for any CCTV operator. It records all video from the Spot Monitor in real-time and at full-frame resolution on an endless loop basis. With simple keyboard control, the operator can mark events, pause live video, instantly switch to reverse playback directly from live, or jump to marked events for playback.

SPOTCHECK has no moving parts and no hard disk as it records directly to removable Compact Flash (CF) memory cards (up to 16GB).

Should an incident occur, the CF card can be instantly removed for safekeeping and replaced with a spare card. All records include playback software for Windows PCs. Recordings may be played back directly from SPOTCHECK to a VCR if required for Police investigations or court use.
